DESCRIPTION

It is made of two layers of high quality kraft paper, with vertical and horizontal yarns (glass fiber) embedded between two layers of paper and coated with vegetable starch glue. Stickiness occurs after dipping into water; It has the characteristics of high viscosity, strong tensile resistance, tight fitting, sealing without warping, anti-unpacking, printing and so on. (Use with wet water sealer).

APPLICATIONS

Water Activated Reinforced Kraft Paper Tape becomes more and more popular in packaging application, with a double layers of kraft paper combined with Prismatic longitudinal glass fiber in the middle layer, coated with natural starch glue which with the benefits of high tensile, environmentally friendly and biodegradable.
